I supable to get at all." New York Press.

A TEST FOR HORSEFLESH. But Even a Chemist Cannot Always Rec

'People are apt to jump at conclu the latest notable murder case. "Chempossible to make some sad blunders in applying it to law and evidence. There nothing, I guess, except to oil it, and I are certain things you can prove by it suppose that was all it needed, or else it if you are sure of your premises and had simply tired and had wanted a rest, certain other things that you cannot. but it's going again now and ticking away like a good one."-New York Sun. deal by chemistry calls to mind the beef extract case that gave a packer in this "Somebody got hold of his beef ex-

tract and claimed that it was made from

horseflesh, and it was proved by analy man that analyzed it. The ordinary test for horseflesh, according to the authorities, is glycogen. This is a substance that, speaking in a general way, is found in horseffest, but does not exist in beef, and it was shown that this particular extract contained glycogen. "The packer came to as in some distress of mind for a way gut of the difficulty. He'said his extract was made of nothing but beef, and he wanted us to belp him prove it, and we did so to his health officers. We demonstrated that, while an ordinary piece of beef did not some of each of these might have entered into the making of the beef extract. The result was that the chemist who had arrived at such sweeping con-

clusions from the first test had to back

The New Bibbons. The new ribbons are very attractive and are evidently going to be more than are gorgeous plaids and the most fasci ing together with a bright, pretty effect variety, and so do glace ribbons with fancy borders. There are ducat relvet ribbons with the ribs running crosswise, some in levely colors, the newest being a clear shade of purple blue.
